

MANTASHA RAFIQ

B.Tech Computer Science Engineering | Batch 2027 | PSIT
+91-8572917786 | itimantasha@gmail.com | LinkedIn | GitHub

CAREER OBJECTIVE

Motivated B.Tech CSE student (Batch 2027) with knowledge of Python, Core Subjects, AI/ML and GenAI seeking an opportunity to learn and contribute to a software development role, applying technical knowledge in building intelligent, scalable solutions and contributing to innovative projects.

EDUCATION

Bachelor of Technology — Computer Science Engineering	2024 – Present
Pranveer Singh Institute of Technology, Kanpur	80.16%
Diploma — Computer Science Engineering	2022 – 2024
Kanpur Institute of Technology, Kanpur	74.84%
Class XII	2021 – 2022
Kanpur City Inter College, Kanpur	74.80%
Class X	2019 – 2020
Kanpur City Inter College, Kanpur	82.33%

TECHNICAL SKILLS

Programming Languages:	Python
AI/ML (Basics):	CNN, Transformers, GenAI, Agentic AI
Tools & Technologies:	Git, GitHub, VS Code, Google Colab
Core Subjects:	DBMS, Operating Systems, Computer Networks, Software Engineering, ML
Databases:	SQL

PROJECTS

DevCollab: Freelancer-Client Collaboration Platform	Sep 2026 – Present
<i>Next.js, TypeScript, Tailwind CSS, FastAPI, Supabase (PostgreSQL, Auth, Realtime), WebRTC, Razorpay, Google ADK, Gemini</i>	
- Building a freelancer-client marketplace with project posting, milestone tracking, task management, and real-time chat using Next.js, TypeScript, and Supabase Realtime. - Developing a FastAPI backend with Supabase Auth (JWT verification) and PostgreSQL row-level security, with Razorpay milestone payments driven by webhook-verified payment states. - Implementing peer-to-peer 1-to-1 video/audio calls using WebRTC, with Supabase Realtime channels for signaling. - Integrating Google ADK agents powered by Gemini for AI-assisted project workflows.	
ParaFlow AI: End-to-End IntelliScribe Autonomous Text Orchestration System	Apr 2026 – Sep 2026
<i>Python, FastAPI, OpenAI API (LLMs), Prompt Engineering, REST APIs, PostgreSQL (Supabase)</i>	
- Accepts user prompts (5,000+ characters) for AI-powered writing, rewriting, summarization, translation, and grammar correction. - Built a scalable architecture using Next.js, FastAPI, PostgreSQL, Redis, and Docker, integrating 15+ REST APIs, JWT authentication, caching, and LLM-based content generation. - Generates high-quality AI content within 2-10 seconds, maintains user history, tracks usage, and supports secure cloud deployment with production-ready SaaS architecture.	
Genora: Antibiotic Resistance Predictor Using Pathogen Genome	Aug 2025 – Dec 2025
<i>Python • CNN • BLT</i>	
- Built a BLT-CNN pipeline to predict antibiotic resistance directly from raw pathogen DNA sequences. - Trained a CNN achieving high classification accuracy across multiple antibiotic resistance classes. - Real-world application potential in clinical microbiology for rapid resistance screening without traditional culture methods.	

CERTIFICATIONS

- BCG GenAI Job Simulation — Boston Consulting Group × Forage
- Agile Product Management — Great Learning
- AI Automation using N8N — CampusX
- Python Programming Fundamentals — Infosys Springboard

ACHIEVEMENTS & EXTRACURRICULAR ACTIVITIES

- Completed BCG GenAI Job Simulation — hands-on exposure to building GenAI solutions for business problems.
- Actively participated in technical webinars and workshops on AI, ML, NLP, and Software Development.
